

# BIO

# EMIRATES GREEN

## LIQUID ORGANIC FERTILIZER

DERIVED FROM SEAWEEDS

CONCENTRATED SEAWEED EXTRACT (35%)

As for these special properties, Emirates Bio Green can be considered a **NUTRITION** and **PLANT BIOLOGY ACTIVATOR**, essential for obtaining high yields and superior quality. In particular with Emirates Bio Green we achieved:

- Increase in growth of crops and plants; especially, to promote the root growth, which improves the plant's ability to absorb the nutrients efficiently
- Thickening, enlargement and balance in leaf growth, with supply of well-balanced crop nutrients
- Supply of vital nutrients for crops, especially, trace elements
- Increased ability of the plant for resisting environmental stress (drought, frost, pests/diseases)
- Improved blossom and fruit set
- Increased produce quality and yield

### Emirates Fertilizers :

- Manufactured to maintain the soil fertility and improve soil properties
- Serve as main source of essential plant nutrients in slow release form
- Reduce the need for chemical fertilizers and soil pesticides
- Free from harmful bacteria, fungus, nematodes and soil-borne diseases
- Free from toxic materials, industrial wastes and sludge
- Rejuvenate soil microbial activity

**PACKING** : Available in packings of 1 Ltr., 4 Ltr. , 20 Ltr. and 200 Ltr. drum

Manufactured in accordance with international technology and standards, by :
